KOHLER, Faucets

Invigoration® Series

11 kW Steam Generator K-5531

Material

 Generator is constructed of insulated stainless steel, which maintains the temperature while ensuring the case is safe to the touch.

Technology

- Fast-Response® technology produces a luxurious steam shower in 60 seconds
- Power Clean™ technology offers one-touch automatic cleaning and safe maintenance
- Constant Steam produces steam at a consistent rate, which greatly minimizes temperature fluctuations.

Installation

317 cubic feet maximum volume rating for custom showering applications

Required Products/Accessories

K-5557 Steam Generator Control Kit K-5559 Small drain pan

Installed component/s: Terminal block for electrical connections, and water inlet screen.

Loose component/s: 3/8 C x F Union, 1/2 C x F Union, and 3/8 C x M Union.

Codes/Standards

UL 499 CSA C22.2 No. 64

KOHLER® Steam Generator Three-Year Limited Warranty

See website for detailed warranty information.

Steam room volume for this generator is 317 cubic feet (9.0 cubic meters).

For every foot of ceiling height over 8 ft (2.4 m), use the next larger steam unit.

For optimum performance, the steam generator must be installed within 25 ft (7.62 m) of the steam head.

Recommended feed water quality should be: Hardness: 60 ppm (3.4 gpg). Total Alkalinity: 150 ppm (8.8 gpg). To ensure proper operation, the feed water supply should be tested prior to operating the steam generator. If feed water quality is not within the specified limit, contact a reputable water treatment company for treatment options.

Maximum inlet pressure is not to exceed 70 psi (483 kPa).

For supply connection, use 90 degree C copper wire.
